

Conference

28th April 2010, Muscat, Sultanate of Oman

Emerging Technologies for the Natural Gas Industry

Papers are invited for the 18th Technical Conference of the Gas Processors Association GCC Chapter. The Conference will be held on 28th April 2010, in Muscat - Sultanate of Oman.

The forums presented will cover both business and technical aspects of Gas Processing. Papers relevant to the following topics are requested:

- Properties of associated and non associated gases.
- Gas separation, conditioning, storage and transportation.
- Gas processing (Gas Treating and Sulfur Recovery, NGL Recovery, Refrigeration and Dew Point Control).
- New Technologies in Gas Processing.
- Corrosion and Erosion concerns.
- Gas Compression and Flaring.
- Gas Processing into Petrochemicals.
- Regulatory Impacts on Gas Processing.
- Products, Quality and Specifications.
- Technical Developments in Gas Processing.
- Marketing and Development Issues.
- Safety and Environmental Aspects.

Interested parties are requested to provide a title and a 200-250 word abstract with presenter's biography by January 31, 2010. Complete mailing addresses, phone and fax numbers should be included with the abstracts. Please forward all your documentations electronically through E-mail. Paper selections will be made in February 2010. Final manuscripts will be due by April 1st, 2010.

The presenter of the best paper at this Conference will receive a GPA-GCC Chapter recognition award. Details for the presentations will be given to the speakers after the paper selections are made. All abstracts and other information should be e-mailed to following addresses.
